

purity.precision.control

The single source for high performance,  
high quality, sanitary valves.

## cgdm series clean gas distribution manifold

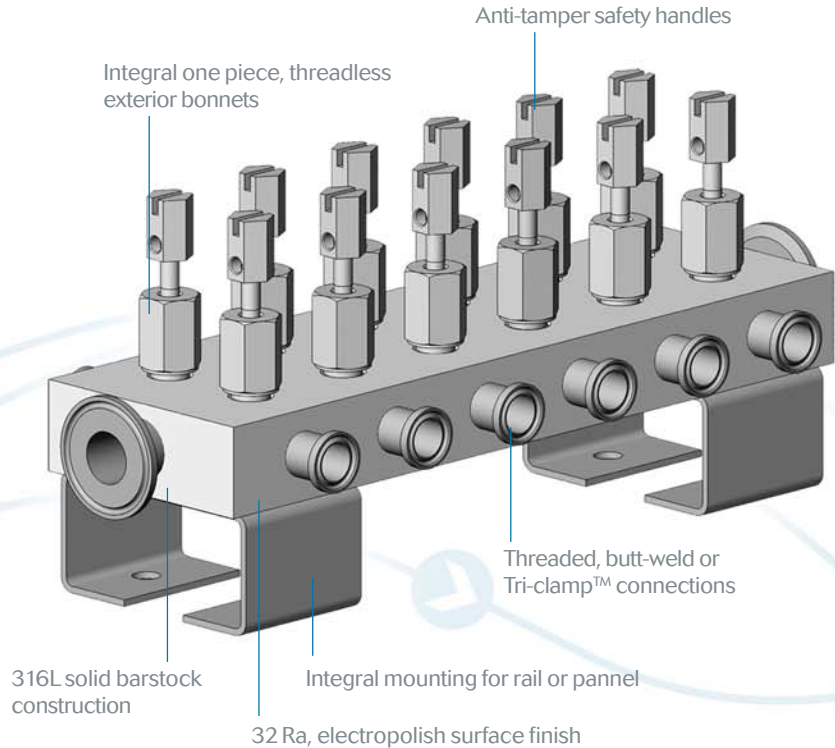

## CGDM Series Clean Gas Distribution Manifold

The CGDM Series 6 and 12 outlet manifolds were created to simplify the complex piping associated with the distribution of clean air and purge gas. Typically, one or two manifolds can be coupled together to handle the gas needs for a given production area.

Available with threaded or Tri-Clamp™ connections, the CGDM provides the same functionality as the capital intensive traditional assembly of multiple ball valves and sanitary fittings.

For nearly two decades, Steriflow has been committed to providing the highest quality, longest lasting, best performing products in the sanitary process industry. With the CGDM Series, the commitment continues.

# For the life of your process...

## Purity

- 32 Ra, electropolished surface finish
- 3/8" orifice straight through flow
- Single piece integral crevice free external bonnets

## Precision

- Precise, steady control of output adjustment
- Large 3/4" bore central chamber with uniform 3/8" bore outlets for consistent output

## Control

- Reliable control for up to 12 actuators, positioners, or other air operated equipment
- Consistent gas control from station to station
- Anti-tamper safety handle prevents inadvertent actuation
