## Project/OEM Success

Congratulations to Russ Bailey of the FS Welsford Company for his recent project success with the MK978 and MK908 at a new Datwyler Pharma Sealing Solutions facility in Delaware. Thank you Russ!

Thanks go out to Zolt Kovacs and Robert Betko of Aseptconn for their recent project success at GSK's vaccine plant in Gödöllő Hungary. Zolt and Robert got the MK9020, and MK96 regulators specified and purchased through their contacts at the end user, and an OEM.

Edge Solutions is on track for a record year, with a very nice project order for SVC/SHC check valves for a bio process application at Biocon. Thank you Shiva and Guru!

## Steriflow News

### Valves in Biopharma Plants

Not all valves in Pharma and Biopharma plants are used on Hygienic or Sterile applications. There are a lot of installation opportunities for other Richards Industries valve brands.

[Check out our recent blog post to learn more.](#)

We enjoyed seeing those of you that attended our reception last month for Interphex at the Bluefin restaurant in Times Square.

Special thanks go out to Tim and Kristen Crowley, Gil and Chris Welsford, and Jim Malloy for bringing customers and the fellows from Atlantic Bioharm. And thanks to all the Steriflow representatives for attending: Paul Trunzo from Tru-Flow, Fabio Stiz and Sergio Cerenzia from Aseptconn, Jacob Rosenkrands and Anders Hunniche from Alflow, Russ Bailey, Steve Limanni, and Jason Bauman from FS Welsford Co, and Kevin Yoo and David Kim from Monucla.

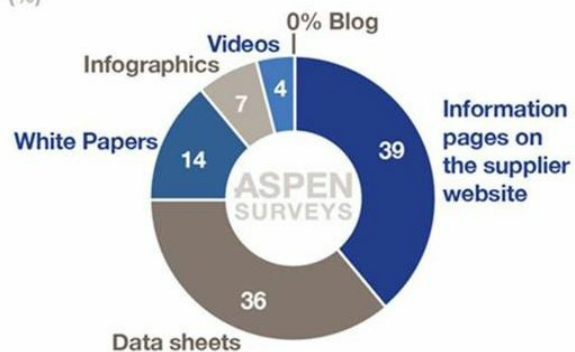

## Recent Polls

Two recent polls conducted by Aspen Survey's are interesting. They asked readers their preference for product information on Supplier websites, and where they get their information about their suppliers products and services. It's good to know that sales people are still valued.

### What format do you most prefer for information on new products and/or services?

(%)

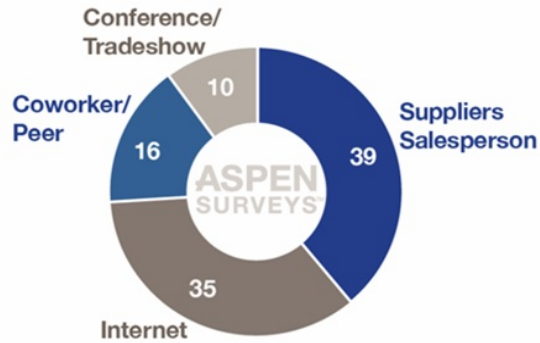

### Participant Comment

"No Comments"

## Market Alert

**What is the most effective way for you to learn about new offerings (products and/or services) at known suppliers? (%)**

### Participant Comment

*"Some of us are not able to attend tradeshow, so we have to learn thru osmosis"*

---

## Recent Price List Changes:

- 4/6/2018 Page 13, Added JSBLF pricing, revised JSB pricing, changed format of Price List 1st page.
- 4/30/2018 Page 36, 37, Removed Tri-clamp from CV standard valve description (since it is a price adder)
