# **JSRHF** Series

# High Flow Bioprocess Clean Gas Pressure Reducing Valves

The JSRHF Series high purity gas pressure regulator was designed and built specifically for Bio-Pharma gas applications.

Traditionally, manufacturers adapted their industrial gas regulators for use in biopharm by simply changing the construction materials and surface finish. Not so with the JSRHF. It's been designed specifically to minimize the exposed threaded connections associated with those traditional designs. And, it features an in-line removable trim set to facilitate quick trim change out and cleaning without valve removal or disassembly.

The durable valve body is machined from ASTM A479 316L. The metal trim components are machined from S21800 Nitronic 60 to prevent galling. The internal components are finished to ASME BPE SF5 20Ra  $\mu$ in (0.5 Ra  $\mu$ m), electropolished standard. The valve is outfitted with the rugged Jorlon diaphragm and Teflon seats and seals that are all FDA approved, USP Class VI compliant materials. These materials of construction enable JSRHF to withstand the rigors of SIP and CIP processes (if required for valves used on liquid applications).

## **F**EATURES

- In-line removable seat and trim facilitate cleaning and maintenance
- Barstock construction guarantees material integrity and surface finish
- Minimized internal volume
- Proprietary Jorlon diaphragm material provides exceptionally long life, CIP/SIP capability, and FDA and USP Class VI compliance
- Soft seat material for ANSI Class VI shutoff

# DOCUMENTATION

- $T' \rightarrow$  following documentation is shipped at no charge:
  - Steriflow Unicert, a QC signed Certificate of Compliance for:
    - Material, listing heat numbers with attached MTR's
    - Surface Finish
  - FDA/USP Class VI for all thermoplastic and elastomers
- Traceability:
  - Each individual product serial number is traceable to the Unicert serial number, heat numbers and attached MTR's

Other documents must be requested at time of RFQ, or order:

- ADI/TSE Free, Certified Test reports, Certificate of Origin.

# **APPLICATIONS**

Ideal for clean gases typically found in bio-pharmaceutical, pharmaceutical and food & beverage processes including:

Clean Filter Air Nitrogen Carbon Dioxide Argon Oxygen Custom purge or blanket gas

**NOTE:** Though not drainable in any installation orientation, this valve can be used on clean steam or non-cavitating liquids with Steriflow engineering application approval.

#### **SPECIFICATIONS**

#### Sizes: 3/4" - 2" (DN20 - DN50)

End Connections: Tri-clamp, Tube weld end and NPT Standard. VCR<sup>®</sup> on Tri-clamp connections optional, contact factory

Gauge Ports: 1/4" FNPT is standard. Consult factory for others

**Body and Trim Material\*:** ASME SA479 316L (UNS 31603) is standard. EN 10272:2000 GR 1.4435, AL-6XN<sup>®</sup>, Hastelloy<sup>®</sup>C-22 and others are optional.

Body Seals: Elastomer o-rings (EPDM, Viton, Silicon, Kalrez) - All FDA and USP Class VI compliant

Soft Seat: PTFE to +252°F (122°C) continuous or 275°F (135°C) intermittent [not to exceed 15 min. in a one hour period] FDA, USP Class VI

#### Shutoff: Class VI

- Spring Range: 25 250 psi (1,7 17,2 bar) 10 150 psi (0,7 10,3 bar) 5 100 psi (0,3 6,9 bar) 5 50 psi (0,3 3,4 bar) 5 -20 psi (0,3 1,4 bar) (2.5 & 3.5 Cv only)

Sizing: Use SVCV Steriflow software sizing module, Size at 60% capacity for 2.5 & 3.5 Cv models, and size at 70% capacity on 5, 7.5 & 10 Cv models

#### Maximum Operating Pressure: 300 psi max inlet @ $100^{\circ}F / psi max \Delta P$

\* The return spring is manufactured from 316 steel.

#### Maximum Operating Temperature: 250 psi max inlet @ 275°F

# Optional Cleaning Specifications: • Clean for Oil-Free

- O2 Cleaning complying with ASTM G93-03 2011 and CGA G-4.1-2009

- Flow Capacity Cv (Kv)
  3/4": Cv 2.5 (Kv 2,16)
  1" & 1-1/2": Cv 3.5 (Kv 3,03), Cv 5 (Kv 4,31), Cv 7.5 (Kv 6,47), Cv 10 (Kv 8,65)
  2": Cv 5 (Kv 4,31), Cv 7.5 (Kv 6,47), Cv 10 (Kv 8,65)

#### Failure - Cv (Kv)

Valve Cv	Failure Cv
2.5	3 (Kv 2,59)
3.5	4.2 ((Kv 3,63)
5	6 (Kv 5,18)
7.5	9 (Kv 7,78)
10	12 (Kv 10,37)

#### Surface Finish:

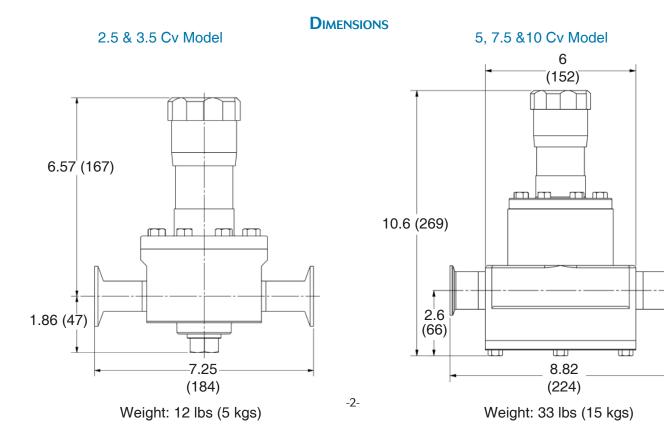

- Wetted Internal surface finish: Mechanically pol-ished, and electropolished to ASME BPE SF5, 20 Ra  $\mu$ in (0.5 Ra  $\mu$ m) as standard\*\*
- Exterior surface finish: Mechanically polished, and electropolished to 40 Ra µin (1.0 Ra µm) as standard,
- Other finishes available upon request

#### Options:

Panel Mount

\*\* NPT treaded end valves: Threads are not 20 Ra (0.5 Ra). Bottom of outlet cavities (inlet, outlet, or gauge ports) are machine finish only. They cannot be polished to spec without damaging the treads. For pure gas installations, Tri-clamp, or weld end connections recommended if specific surface finish is required at bottom of cavity ports.

Note: For a complete ancillary list of all wetted and non-wetted material specifications, please contact Steriflow Valve.

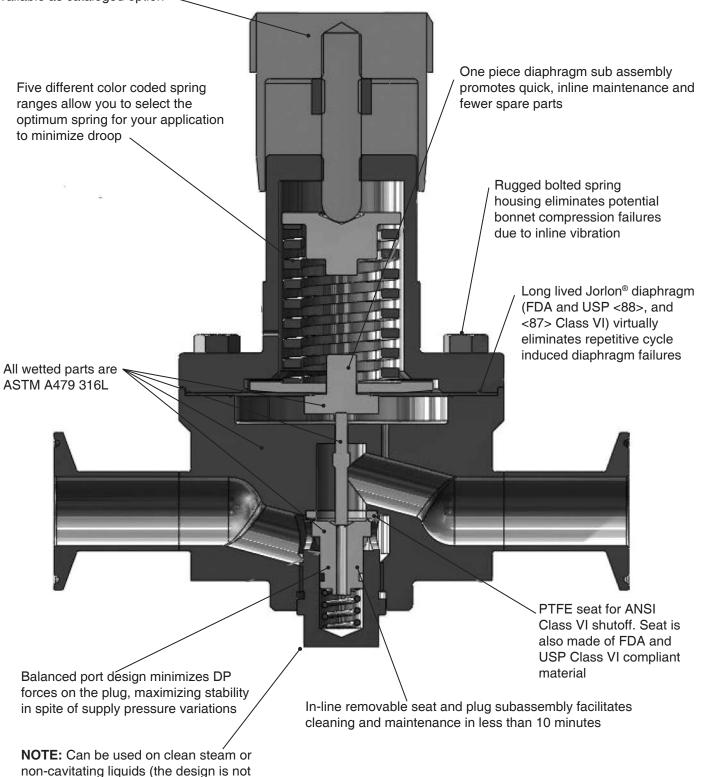

# FEATURES & BENEFITS - MODEL JSRHF: 2.5 AND 3.5 CV

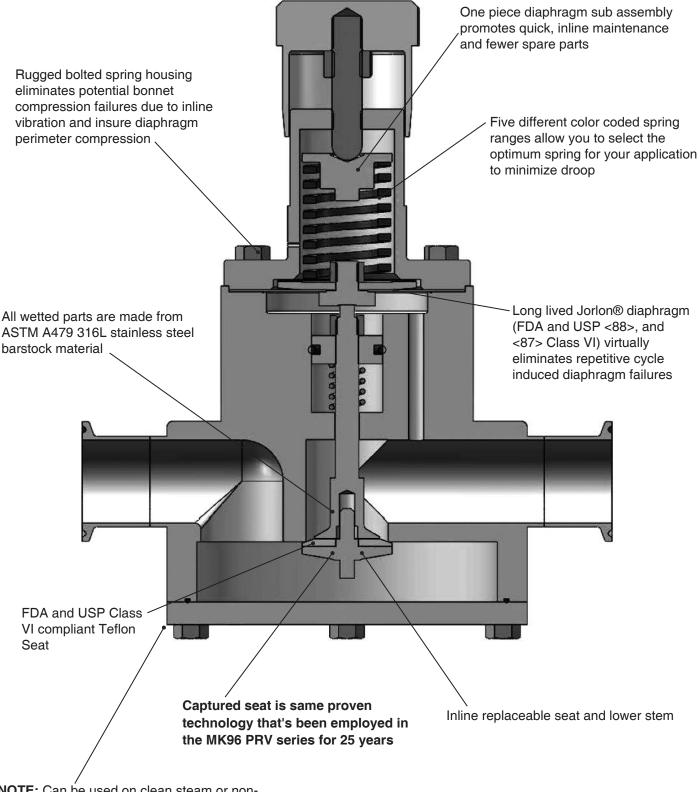

Autoclavable anodized aluminum knob available as cataloged option —

drainable) with Steriflow engineering ap-

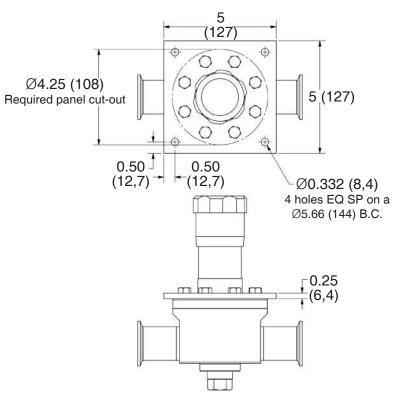

plication approval.

# FEATURES & BENEFITS - MODEL JSRHF: 5, 7.5 & 10 CV

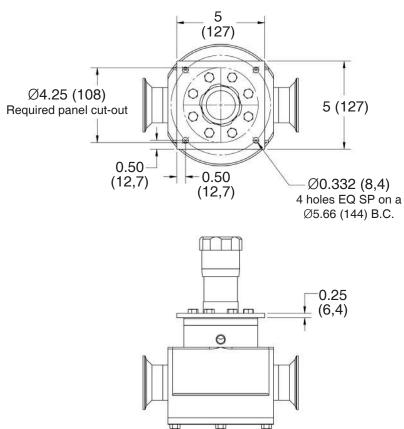

**NOTE:** Can be used on clean steam or noncavitating liquids (the design is not drainable) with Steriflow engineering application approval.

Weight: 12 lbs (5 kgs)

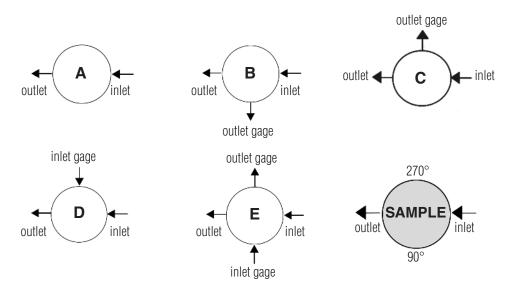

# PANEL MOUNT (PM) OPTION FOR 5, 7.5 & 10 CV

# Weight: 33 lbs (15 kgs)

# PANEL MOUNT (PM) OPTION FOR JSRHF 2.5, 3.5 CV

# FLOW CONFIGURATIONS/ GAUGE PORT OPTIONS

\* Gage ports are 1/4" FNPT. Consult factory for Tri-clamp, VCR or other alternatives, or porting options.

# **OPTIONS FOR JSRHF**

#### **Air Augment**

The air augment option provides a means for air loading the valve spring housing for automated control. To enable this function a 1/8" FNPT collar is installed on the spring housing (the same one used for the captured vent option), and a Teflon seal nut is included to seal the adjusting screw threads to prevent leakage. The 1/8" FNPT port is used as the input fitting for loading the spring housing with instrument air to completely automate or augment manual regulator control. An I/P transducer, or a small, self-relieving air set PRV regulator is required (ordered separately) to regulate the instrument air pressure.

## SAMPLE SPECIFICATIONS

Stainless Steel pressure regulator shall be made from ASTM A479 barstock material, which includes body and all wetted metal parts. Regulator shall be activated by an un-tied, FDA approved, USP Class VI certified Jorlon<sup>™</sup> diaphragm. Regulator internal to hold minimal media volume. Regulator shall have one piece diaphragm subassembly, and trim that can be replaced inline without dome/spring chamber disassembly.
