

FB5C Series

3A Sanitary Back Pressure Regulators

The FB5C is available with a hard seat and a variety of diaphragm and o-ring materials, making the valve well-suited for virtually any hygienic back pressure application.

The FB5C operates by sensing the inlet pressure, or back pressure, beneath the diaphragm, as flow enters from inlet port on the side. As the back pressure exceeds the set-point, the diaphragm force compresses the range spring permitting the stem to move from the seat toward the open position. As the flow increases, the back pressure is relieved and the spring and diaphragm relax, allowing the stem to return to the normally closed position. If a different set point is desired, a simple turn of the adjusting screw will increase or decrease the setting to any set point within the range covered by the regulator's spring.

FEATURES

- No guiding surfaces in the fluid – prevents particulate generation
- 100% 316L body and trim
- Self-draining
- No threads to disassemble for cleaning
- Clean-in-Place, Steam-in-Place – dome features spring arrangement to allow CIP/SIP

AVAILABLE FINISHES

Body

- Standard: 32Ra (0.8 Ra μ m) mechanical finish on all wetted surfaces; as cast finish on exterior.

Spring Housing

- Standard: as cast finished 316SST

Adjusting Screw and Handle

- Standard: 32Ra (0.8 Ra μ m) (Note: adjusting screw is a threaded part)

SPECIFICATIONS – 3A VALVES (FB5C)*

Sizes: 1/2", 3/4", 1", 1-1/2" 2", 3" (DN15-DN80)

End Connections: Sanitary Clamp

Trim Materials: 316L Stainless Steel (ASTM A479, S31603)

Body Materials: ASTM A351, CF3M 316L

Seat Materials

- Standard hard seat – integral 316L SST seat

Spring Housing Materials

- CF8M cast SST (1/2" – 3")

Diaphragm Materials for 3A Valves

- EPDM (to 120°F, 49°C), 3A spec. (1/2" - 1" only)
- Jorlon (to 250°F, 121°C), 3A & FDA

O-Ring Materials for 3A Approved Valves

- EPDM (to 120°F, 49°C)
- Teflon-Encapsulated Viton (to 250°F, 121°C)

Shutoff: ANSI Class III hard seat

FEATURES & BENEFITS

APPLICATIONS

The FB5C is suitable for a variety of process and clean utility applications in the food, beverage, dairy and health and beauty industries including: CIP, SIP, centrifuges, autoclaves, culinary equipment, sterilizers, process tanks, nitrogen blanketing, etc.
